

# Drinking Water Systems in Newfoundland and Labrador: A Work in Progress

This presentation will discuss the evolution of drinking water systems in Newfoundland and Labrador, including changes in water infrastructure and operations, policy and governance, and public perceptions and demands, particularly in Corner Brook and western Newfoundland. The presenter will also discuss a recent study highlighting current challenges and potential future directions for ensuring drinking water security and access to clean, safe drinking water in the province.

**Guest Speaker:** **Dr. Kelly Vodden, Associate Professor (Research)**  
**Environmental Policy Institute, Grenfell Campus, Memorial University**

**7:30 - 9:00pm Tuesday, March 22nd**  
**Corner Brook Museum and Archives**
